Risk Disclosure

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund's objective may not be achieved in adverse market conditions. During times of very low interest rates, the interest received by the Fund could be less than the costs of operating the Fund.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the Fund's potential risks can be found in the Key Investor Information Document and Prospectus.
